

# JAPAN Observatory

**4-6 February 2015  
Fiera Milano City  
[Hall 2]**

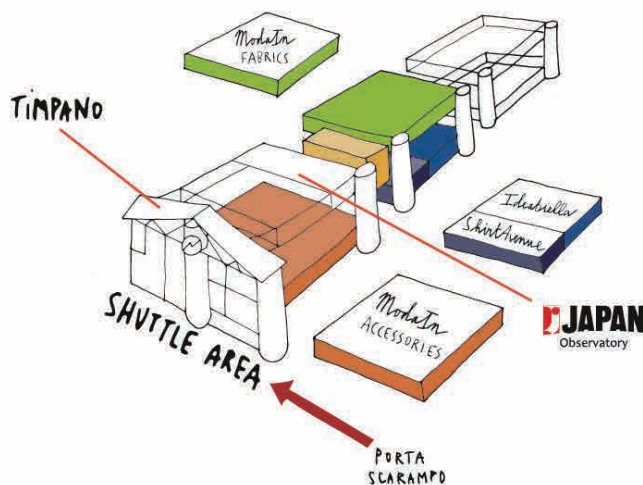

**33 Fabric Makers  
1 Accessory Maker**

At the behest of globalisation and divergent individual values, this season will prioritize delving to the depths of value and bringing values themselves to a higher plane. Accordingly, the need to respond to constantly changing values, enveloped in originality and unpredictability and with an unconventional perspective, will become increasingly crucial. We shall achieve this by focusing our efforts to structure global supply chains, underpinned by a respectful and reliable circle, with a proud spirit and unbridled enthusiasm. Let us strive to widely bridge and reinforce the circle of trust to generate a wonderfully creative universe of fashion that persists!

The Japan Fashion Week Organization (JFW) operates the Japan Observatory in collaboration with Milano Unica.

The Japan Observatory is comprised of business booths by a total no. of 34 companies as well as PR and Trend booths presenting the trends and index composed of representative fabrics from the exhibitors.

We proudly introduce the premium quality fabrics representing unequalled innovation and the spirit of craftsmanship, by presenting the selected 34 companies ; 33 fabric makers and 1 accessory maker under the scope.
